How to disable your pop-up for the survey form to work.

1. If you have a "Google" tool bar, you will have to disable the popup blocker to allow the form to open in another window.

2. If you have both a "Google" tool bar and Internet Explorer you will also have to turn off the popup blocker by selecting "Tools" from your menu bar and selecting Internet options.

3. Under the Privacy Tab, uncheck the Block pop-ups box or select "Settings" and add this site (http://www.ams.usda.gov/lscp/lscp_product_survey_commodity_food_purchases.htm) to your Exceptions listing. See examples below.
